

## Screenshot 3: Live Credential Input Form (Tally URL)

### Suggested Caption:

*"Screenshot showing the live Pro-Logic Shield credential input form hosted via Tally. This form acts as the behavioral trigger for the Mint Unit creation workflow and demonstrates user-facing accessibility as of April 2025. The URL placement confirms the system was deployed in a live, usable format for testing."*

---

### Why This Screenshot Matters:

- It proves your system isn't just backend automation — it has a **user interface**
  - Helps validate that **real users** (or testers) could access and initiate the logic
  - Shows **practical readiness** for field use, which is essential for pilot-stage classification
- 

### Optional Enhancements:

If you're preparing a visual submission:

- You could place this screenshot side-by-side with **Screenshot 2 (user entries)**
- Label this as "Step 1 – Accessing the Credential Minting Form"
